1. The first part of the paper is devoted to a general
discussion of the problem. It is shown that the
problem is of great importance and that it has
not been completely solved. The author then
presents a new method for solving the problem.
This method is based on the use of the
variational principle. It is shown that this
method is more efficient than the methods
previously used. The author then applies this
method to the problem of the motion of a
particle in a magnetic field. It is shown that
the results obtained are in good agreement
with the experimental data. The author then
